

Essential Medication Skills for Care Home Staff

Medication management by Care Home Staff, is often a key reason why Care Homes are graded as Inadequate or Requires Improvement by the Care Quality Commission (CQC).

We are therefore pleased to offer a range of 1 or ½ day courses designed to ensure Care Home Staff have all the necessary skills and competence to manage all aspects of medication management required to meet CQC regulatory requirements, whether for new staff or as a refresher.

The training is classroom based, delivered by nurse qualified trainers, and includes full competency assessments completed, so full evidence of competency can be demonstrated to CQC. So don't rely on staff completing online e-learning, get face to face, competency assessed training at competitive prices.

Don't delay, contact us today to discuss your training needs.
