

## Essential Medication Skills for Domiciliary Care Assistants

Medication management by Domiciliary Care Assistants, is often a key reason why Domiciliary Branches are graded as Inadequate or Requires Improvement by the Care Quality Commission (CQC).

We are therefore pleased to offer a ½ day course designed to ensure domiciliary care assistants have all the necessary skills and competence to manage all aspects of medication management required to meet CQC regulatory requirements, whether for new staff or as a refresher.

The training is classroom based, delivered by nurse qualified trainers, and includes full competency assessments completed, so full evidence of competency can be demonstrated to CQC. So don't rely on staff completing online e-learning, when you can get up to 24 staff a day\*, fully compliant by professional course at a cost of only £12.50 per delegate

\*based on 2 courses of 12 delegates on each running
